PROFESSIONAL SUMMARY

Second Class Honours (Upper Division) Computer Science graduate specializing in software maintenance, data analytics, and Artificial Intelligence.

- Driving system reliability and digital transformation at Prasarana Rapid KL, optimizing Automated Fare Collection (AFC) systems.
- Developed AI-powered workflow solutions that significantly enhanced operational efficiency, data accuracy, and reduced manual overhead.
- Analytical and detail-oriented, leveraging technical expertise to deliver robust software solutions and support strategic revenue targets.

RELEVANT COURSEWORK

- Database Management | Programming Techniques | Multimedia Data Preprocessing
- Artificial Intelligence | Application Development | Web Programming
- Data Visualization | Software Engineering | Mobile Programming | Computer Security

EXPERIENCE

PRASARANA MALAYSIA BERHAD

Software Maintenance Executive | Nov 2024 - Present

- **System & Network Reliability:** Maximized AFC system availability (CC, PcVue, TVM, AVM, Gates) and ensured 100% data accuracy for ridership and revenue by resolving software, OS, and network errors.
- **Strategic Operations:** Supported rail revenue and ridership targets through reliable system performance, while leading system development initiatives and processing MY50 transit claims.
- **Compliance & Safety:** Maintained ISO certification with zero repetitive IMS NCR findings and upheld strict OSH standards to proactively minimize workplace injuries.

PETRONAS (Internship)

Data Analysis Intern | Sep 2023 - Feb 2024

- Analyzed governance advisory data and presented findings through visualizations using Power BI, with dashboards actively utilized by the department.
- Presented results to supervisors and discussed data-driven solutions for departmental problems.
- Performed administrative tasks such as scheduling meetings, interacting with business stakeholders, and following up on submissions.
- Assisted in paper registration and workflow automation via Power Apps.

PBERNAMA TV (Internship)

Front End & Back End Developer / IT Technician | Sep 2020 - Dec 2020

- Supported the development team in creating a website for BERNAMA by designing and developing front-end and back-end components.
- Developed both the front-end and back-end of a staff directory system and thoroughly documented the development process.
- Tested and analyzed user feedback to identify website improvement areas and enhance user experience.

PROJECTS

TCCR (TVM CCR Collection) System | Prasarana Sdn Bhd

- Developed and deployed an AI and automation-powered digital workflow system, utilizing Python, OpenCV, Tesseract OCR for automated receipt recognition and data extraction.
- Successfully implemented across Kelana Jaya (KJL), Ampang (AGL), and Monorail (MRL) lines, significantly reducing manual data entry, minimizing human errors, and enabling a paperless, cost-effective operation.

Final Year Project: Using AI to Develop Sign Language Translation System

- Developed an NLP/Computer Vision system to translate sign language using Python, TensorFlow, CNNs. Handled multimedia data preprocessing and geometric modeling to bridge communication gaps, achieving 80% accuracy in testing

Diploma Final Year Project: KAFA Managing System

- Designed and developed a comprehensive management system utilizing software engineering principles, user interface design, VB.net programming, and database management to streamline administrative operations.

TECHNICAL SKILLS

- Programming & ML: SQL, PHP, HTML, CSS, C++, Java, Python, Matlab, JavaScript, TensorFlow, CNN, OpenCV, NumPy, Pandas. Keras. PyTorch
- Data Analysis & Visualization: Power BI, Tableau, Power Automate, Power Apps, Microsoft Excel
- System & Network Maintenance: AFC Systems, TVM/AVM/Gate Troubleshooting, Parameter File Management, ISO Compliance, OSH Standards
- Web & Software Development: VS Code, Android Studio, GitHub, MySQL, XAMPP, Unity, Dreamweaver
- Multimedia & Design: Adobe Photoshop, Illustrator, Premier Pro, Blender, UI/UX Design

EDUCATION

Universiti Teknologi Malaysia

2021-2024

Bachelor of Computer Science in Multimedia and Graphic Software (Hons)

Johor Bahru

CGPA: 3.21 / 4.0 (Second Class Honours, Upper Division)

Universiti Teknologi Malaysia

2018-2021

Diploma in Computer Science in Information Technology

Kuala Lumpur

- **CGPA:** 3.30 / 4.0

AWARD & ACHIEVEMENT

- Winner, 'PERFORM' Award (May 2026): Recognized for developing and deploying the AI-powered TCCR System across multiple rail lines to optimize operations and reduce costs.
- Dean's List (2 Semesters): Universiti Teknologi Malaysia (Diploma).
- Leadership: Head of Multimedia Unit, MGR Program (2023; generated RM13,000 revenue for 700+ participants) and Director, Photofam'20 (2020).
- Petronas BeDigital Bootcamp Cohort 9 (2024): Selected among 100 final-year students from 5 public universities.
- Community & Early Achievement: COVID-19 Task Force Volunteer (2020) and Certificate of PROFESOR MUDA, PROGRAM JUARA (2017).
